ENES YILMAZ

IT Specialist & React Native Developer

📞 +90-546-533-6603   ✉ officialenes@icloud.com   🐙 github.com/hyzle

IT Specialist and React Native Developer with hands-on experience in system administration, virtualization, network security, and mobile application development. Strong background in Windows Server, VMware ESXi, and modern JavaScript-based mobile technologies, combining infrastructure expertise with product-focused development.

SKILLS

INFRASTRUCTURE & IT

- Windows Server Management
- VMware ESXi & Virtualization
- Network Management & Security
- Firewall & Switch Configuration
- DNS & Active Directory
- Backup & Restore Operations
- File Server Management

SOFTWARE DEVELOPMENT

- React Native
- React
- Expo
- Firebase

LANGUAGE

- Turkish (Native)
- English (B2)

EDUCATION

Associate Degree in Computer Programming
Institution: Kastamonu University
Year of Graduation: 2023

WORK EXPERIENCE

Istabul Technical University IT Department
~Intern   08.2023 – 09.2023

- **Mobile Application Development:** Contributing to ongoing projects or developing new mobile applications by coding, testing, and debugging.

- **UI/UX Design:** Making improvements to the user interface and user experience, integrating designs into applications.

- **Team Collaboration:** Working with other software developers, designers, and project managers, attending meetings, and reporting project progress.

PORTFOLIO

Daen Password – *Secure Password Management Application*

Designed and developed a multi-layered encrypted password manager with category-based organization, automatic logo recognition, and backup/restore functionality.

- App Store:
